JuCoin Introduction

Established in 2013;

In 2017, it ranked first in the world by single-day trading volume;

In 2020, after obtaining the MAS exemption from Singapore, the company started its journey of compliance;

In 2024, an important turning point was ushered in—it was fully acquired by the Worlds top 500 EXOR Group, and was officially upgraded and renamed JuCoin Exchange.

DeFi's universal problems and pain points

Hard consensus Consensus is hard!

Speculators make money and co-builders lose money!

Get in early with cheap chips and later only high price chips!

Early entry leads to high multiple profits and later entry leads to low multiple profits and easy to get trapped!

Ju Stellar

JuStellar | Economic Underlying Theory Support

JuStellar does not break the essence of DeFi and solves the pain points of DeFi!

Redefining the rules of wealth distribution

The earlier you join, the more personal assets you have!

The later you join, the more wealth you will gain!

Investors make you money, speculators make you money, consensus people make you money, preachers make you money!

Make money from investing, speculating, consensus and preaching!

Enter early and make money, enter late and make money!

The turmoil of the global economy will lead to a huge reshuffle in the financial market.
And the JuStellar is undoubtedly the most innovative, dynamic and promising market among them!
The occurrence of cross-regional political and bilateral trade events has led various countries to adjust their monetary policies.

Many people haven't noticed it yet, but a group of people have already benefited from it!

This is an unparalleled feast!
How to seize the opportunity? Build your own wealth!

Focus on incubating RWA ecology and helping listed industrial clusters
